### **DETAILED ACTION**

1. Claims 12-20 are pending. Applicant's amendments and arguments filed 6/18/01 have been entered

#### **Priority**

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

## Objections/Rejections Withdrawn

3. The following Objections/Rejections as set forth in Paper #17 have been withdrawn:

The rejection of claims 12-20 under 35 USC 103 as being unpatentable over Naik (US 5,387,373) has been withdrawn

## Claim Rejections - 35 USC § 103

- 4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 5. Claims 12-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Surutzidis et al (US 5,858,950) for the reasons of record set forth in Paper #5.

Additionally, Surutzidis et al states that the compositions may be employed in heavy duty liquid laundry compositions, machine dishwashing compositions, and other washing processes where sudsing is of importance. The Examiner asserts the other washing processes where sudsing is important as taught by Surutzidis et al would encompass and suggest to one skilled in the art the use of the cleaning compositions in manual dishwashing as recited by instant claims 19 and 20.

## Response to Arguments

With respect to Surutzidis et al, Applicant states that Surutzidis et al is drawn to low sudsing cleaning composition and that independent claim 12 has been amended to show the distinction between the claimed invention and the compositions taught and suggested by Surutzidis et al. In response, note that, Applicant has amended claim 12 to include the limitation "such that the composition provides sudsing" which is generic terminology encompassing low sudsing compositions, high sudsing compositions, etc. The instant claims only require that the compositions provide sudsing which is clearly taught and suggested by the cleaning compositions of Surutzidis et al; the Examiner sees no distinction between the "sudsing" recited by the instant claims and the sudsing compositions taught by Surutzidis. Nowhere in the instant claims does it require that the compositions are high-sudsing or mild to the skin and these limitations are not read into the instant claims. Additionally, the Examiner asserts that the compositions taught by Surutzidis et al would have the same properties as recited by the instant claims because Surutzidis et al suggest cleaning compositions containing the same components in the same proportions as recited by the instant claims. Furthermore, Applicant has not provided any data or evidence showing the unexpected and superior properties of the claimed invention over the prior art products. In re Boesch, 205 USPQ 215.

#### Conclusion

Application/Control Number: 09/341979

Art Unit: 1751

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date

of this final action.
